

# Get the Most Out of Your BlackBerry Storm

## Download the latest enhancements for your BlackBerry Storm.

Verizon Wireless is pleased to announce new software enhancements for your BlackBerry® Storm™ smartphone. The Research In Motion® (RIM®) update (5.0.0.323 version) includes many software updates and enhancements that will elevate your experience with the BlackBerry Storm.

Verizon Wireless and RIM encourage you to download these improvements today.

## Using your BlackBerry Storm will be even more convenient and enjoyable with the following enhancements:

- Typing experience:
  - A faster, more accurate and more natural text input experience. This includes word completion (enabled right out of the box), a virtual QWERTY keyboard in portrait view, and enhanced sensitivity when editing, copying, and pasting.
  - The ability to enable Auto Correction as opposed to Word Completion in landscape view. Your mistakes will be corrected for you.
  - The ability to send an email quickly by pressing the Send button; save your changes in a calendar appointment or contact by quickly pressing the Save button; and access Web pages by quickly pressing the Go button.
- SMS experience:
  - Adapted to emulate the chat windows you're familiar with in popular desktop IM applications. The new Messages list interface threads incoming and outgoing SMS communications as a conversation history, with support for emoticons and contact information from your address book—including pictures.
- Touch user interface:
  - The flick of your finger creates momentum, moving you quickly through messages, pictures, and more in a single swipe.
- Media experience:
  - Launches camera faster
  - Quicker image capture
  - Launches applications faster
  - Rotates faster between portrait and landscape views
  - Improved Web browsing speeds

If you are using a BlackBerry Enterprise Server 5.0, you can take advantage of these additional enhancements:

- Ability to forward calendar appointments
- Flag messages for follow-up
- Ability to view attachments in a meeting request and/or calendar entry
- Manage mail folders, including adding, moving, renaming, and deleting—similar to a desktop experience
